PRELIMINARY AMENDMENT

BOX PCT
Commissioner for Patents
Washington, D.C. 20231

Sir:

Prior to initial examination, please amend the above-identified patent application as follows:

IN THE SPECIFICATION:

Please insert section headings and delete and amend specification paragraphs as follows. (Pursuant to 37 CFR 1.121, marked-up versions of the amended specification paragraphs are attached.)

On amended page 1, after the title, please insert the following section headings:

BACKGROUND OF THE INVENTION

1. Field of the Invention

On amended page 1, after the first complete paragraph, please insert the following section heading:

2. Description of the Related Art

On amended page 1, after the second complete paragraph, please insert the following section heading:

SUMMARY OF THE INVENTION

On amended page 3, please delete the first paragraph which begins with "One exemplary" and ends with "which:"

On amended page 3, before the paragraph which begins with "Figure 1", please insert the following section heading:

BRIEF DESCRIPTION OF THE DRAWINGS

On amended page 4, before the first complete paragraph, please insert the following section heading:

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

IN THE CLAIMS:

Please cancel original claims 1-10 and rewrite them as new claims 11-30 as follows:

11. A clothes hanger comprising a hook and two arms projecting from it, wherein the arms are each formed by a bottle-shaped container.

12. The clothes hanger as claimed in claim 11, wherein each of the bottle-shaped containers is fastened by its mouth to the hook.

13. The clothes hanger as claimed in claim 12, wherein the bottle-shaped containers are each detachably fastened to the hook.

14. The clothes hanger as claimed in claim 12, wherein the hook has a thread for each bottle-shaped container, and each of the bottle-shaped containers is screwed into one of these threads by its mouth.

15. The clothes hanger as claimed in claim 11, wherein the bottle-shaped containers are plastic bottles.

16. The clothes hanger as claimed in claim 11, further comprising a fastening part for the detachable fastening of the bottle-shaped containers, the fastening part located on the lower end of the hook.

17. The clothes hanger as claimed in claim 16, wherein two screw caps are inserted into the fastening part, into each of which bottle caps a bottle-shaped container is screwed.

18. A hook for a hanger, comprising two fastening means, each of which is provided for the fastening of a bottle-shaped container.

19. The hook as claimed in claim 18, wherein each of the fastening means has a thread.

20. The hook as claimed in claim 19, wherein the hook is manufactured in the form of a plastic injection molded part.

21. The clothes hanger as claimed in claim 13, wherein the hook has a thread for each bottle-shaped container, and each of the bottle-shaped containers is screwed into one of these threads by its mouth.

22. The clothes hanger as claimed in claim 15, wherein the plastic bottles are beverage bottles.

23. The clothes hanger as claimed in claim 12, wherein the bottle-shaped containers are plastic bottles.

24. The clothes hanger as claimed in claim 13, wherein the bottle-shaped containers are plastic bottles.

25. The clothes hanger as claimed in claim 14, wherein the bottle-shaped containers are plastic bottles.

26. The clothes hanger as claimed in claim 12, further comprising a fastening part for the detachable fastening of the bottle-shaped containers, the fastening part located on the lower end of the hook.

27. The clothes hanger as claimed in claim 13, further comprising a fastening part for the detachable fastening of the bottle-shaped containers, the fastening part located on the lower end of the hook.

28. The clothes hanger as claimed in claim 14, further comprising a fastening part for the detachable fastening of the bottle-shaped containers, the fastening part located on the lower end of the hook.

29. The clothes hanger as claimed in claim 15, further comprising a fastening part for the detachable fastening of the bottle-shaped containers, the fastening part located on the lower end of the hook.

30. The clothes hanger as claimed in claim 16, wherein two screw caps are inserted into the fastening part, into each of which bottle caps a bottle-shaped container is screwed.

IN THE ABSTRACT:

Please replace the paragraph on page 8 with the following rewritten paragraph:

A clothes hanger is provided with a hook and two arms projecting from it. Each of the arms is formed by a bottle-shaped container. The hook preferably has a thread for each bottle-shaped container. Each of the bottle-shaped containers is detachably screwed into one of these threads by means of its mouth.

REMARKS

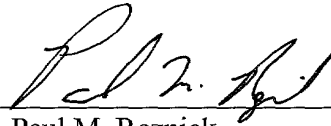

The specification has been amended to place the application in conformance with standard United States patent practice.

Examination and allowance of pending claims 11-30 are respectfully requested.

Respectfully submitted,

WEBB ZIESENHEIM LOGSDON
ORKIN & HANSON, P.C.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the abstract:

Paragraph beginning at page 8 has been amended as follows:

[The] A clothes hanger is provided with a hook [(2)] and two arms projecting from it. Each of the arms is formed by a bottle-shaped container [(4)]. The hook [(2)] preferably has a thread [(8)] for each bottle-shaped container [(4)]. Each of the bottle-shaped containers [(4)] is detachably screwed into one of these threads [(12)] by means of its mouth [(7)].

Clothes Hanger

This invention relates to a clothes hanger with a hook and two arms projecting from it.

FR-A-2 719 207 describes a clothes hanger with a hook and two arms projecting from it.

The object of the invention is to create a clothes hanger that preserves the shape of the articles of clothing hung on it and can nevertheless be manufactured very economically.

The invention teaches that this object can be accomplished by a clothes hanger of the type described above in which each of the arms is formed by a bottle-shaped container.

Beverage bottles, among other things, have an essentially cylindrical shape with rounded edges and are extremely well-suited as supports for clothes. The drinking bottles provide a seamless and very protective support for articles of clothing. Used plastic beverage bottles are particularly well suited for use as the bottle-shaped containers. These bottles are very lightweight and yet retain their shape very well. The clothes hanger claimed by the invention is therefore particularly well suited for the recycling of used beverage

bottles. The used beverage bottles simply need to be cleaned, which means that the recycling process consumes very little energy.

In one development of the invention, each of the bottle-shaped containers is fastened by means of its mouth to the hook. A fastening of this type is particularly simple and stable if the hook has a thread for each bottle-shaped container and each of the bottle-shaped containers is screwed into one of these threads by means of its mouth. The bottle-shaped containers can then be fastened to the hook and removed from it very easily. The hook need only be provided with two threads. Because threads of this type are standard on beverage bottles, a great many different types of beverage bottles can be used.

The hook can be manufactured very economically in the form of an injection molded plastic part. Other materials can also be used, however, such as iron, wood and similar materials. The hook can also be provided with a wire loop.

Clothes hangers as taught by the invention are also well suited for use as advertising media.

The invention also relates to a hook for a clothes hanger. This hook is characterized by two fastening means that are provided for the fastening of two bottle-shaped containers. Because beverage bottles can be found in almost every household, the manufacture of the clothes hanger can be limited to the manufacture of the hook. The arms

One exemplary embodiment of the clothes hanger taught by the invention is described in greater detail below and is illustrated in the accompanying drawings, in which:

Figure 2 is a schematic illustration of the fastening of a beverage bottle to a hook

and

AMENDED PAGE

Figure 1 shows a jacket 5 which is hung on a clothes hanger 1. This clothes hanger 1 consists essentially of a hook 2 and two bottle-shaped containers 4 which are fastened to said hook.

To fasten the bottle-shaped containers to the hook 2, the hook 2, as shown in Figure 3, has two threads 12 which are formed by threaded caps 11, each of which is inserted into a recess 10 of a fastening part 3 of the hook. The covers 11 are fastened in the recesses 10 in a suitable manner such as by locking, latching and/or by means of a suitable adhesive or by welding. The thread 12 can also be formed directly on the fastening part 3, however. The hook 2 can be a single-story injection molded part, for example.

Each of the bottle-shaped containers 4 is screwed by means of a thread 8 on its mouth 7 in the direction indicated by the arrow 9 onto one of the two threads 12 as illustrated in Figure 2. The threads 12 are opposite each other and are oriented so that the two bottle-shaped containers 4 fastened to the hook 2 are at an appropriate angle to each other, which angle is preferably greater than 90 degrees. The fastening of the bottle-shaped containers 4 to the hook 2 is preferably although not necessarily detachable. The threaded connection shown here can also be replaced by other suitable connections, such as snap connections or locking connections.

The hook 2 is preferably made of plastic using the injection molding process. The curve 6 of the hook 2, however, can

also be a curve made of wire or a similar material. It is also conceivable that the hook can be made of wood or another suitable material.

AMENDED PAGE

Claims

1. Clothes hanger with a hook (2) and two arms projecting from it, characterized by the fact that the arms are each formed by a bottle-shaped container (4).
2. Hanger as claimed in Claim 1, characterized by the fact that each of the bottle-shaped containers (4) is fastened by means of its mouth (7) to the hook (2).
3. Hanger as claimed in Claim 2, characterized by the fact that the bottle-shaped containers (4) are each detachably fastened to the hook (2).
4. Hanger as claimed in Claims 2 or 3, characterized by the fact that the hook (2) has a thread (8) for each bottle-shaped container (4), and each of the bottle-shaped containers (4) is screwed into one of these threads (12) by means of its mouth (7).
5. Hanger as claimed in one of the Claims 1 to 4, characterized by the fact that the bottle-shaped containers (4) are plastic bottles, in particular beverage bottles made of plastic.
6. Hanger as claimed in one of the Claims 1 to 5, characterized by the fact that a fastening part (3) for the detachable fastening of the bottle-shaped containers (4) is located on the lower end of the hook (2).

7. Hanger as claimed in Claim 6, characterized by the fact that two screw caps (11) are inserted into the fastening part (3), into each of which bottle caps a bottle-shaped container (4) is screwed.
8. Hook for a hanger, characterized by two fastening means (3), each of which is provided for the fastening of a bottle-shaped container (4).
9. Hook as claimed in Claim 8, characterized by the fact that each of the fastening means (3) has a thread (12).
10. Hook as claimed in Claim 9, characterized by the fact that it is manufactured in the form of a plastic injection molded part.
